

Earth's Crop Yields are now Affected by the Sun

[— ADAPT 2030 Video Link —](#)

Looking through some of the AG headlines coming out of Canada, wet weather slows harvest in Saskatchewan, also excessive rains in September affects the crops.

AGROINSURANCE

	<p>Canada - Wet weather slows harvest across Saskatchewan</p> <p><i>28.09.2018</i></p>
	<p>USA - September has excessive rainfall that affects fall crops</p> <p><i>01.10.2018</i></p>

Over to AGWEB, snow plagues Canadian farmers in the heat of the harvest, this is September 13th. Even in the article it's quoted from farmers, "it's exceptional the amount".

September 13, 2018

Snow Plagues Canadian Farmers In The Heat Of Harvest

Canada farmers received an early snow this season.

"It's not unheard of for us to get snow during harvest, **but it's exceptional to get this amount**," says Jerome Isaac, who grows hard red spring wheat, canola and yellow field pears in Alberta, Canada. "Yesterday we got about six inches of snow and it hasn't melted."

Keep in mind that wasn't even officially the start of fall, it was still officially summer when this happened. This is how much snow came down September 12th.

With the intensification of the Grand Solar Minimum, you would expect to have shorter growing seasons with early snows that will affect the crops, and yields coming out of the fields.

The shift of our global weather patterns are set to amplify 2x from July-Dec 2017, and from 2018-2019 a 4x shift, with another jump up as the spread widens to 6x in 2019. (I explain this in detail on pages 38-41)

Orange arrow, this is where we are we're moving to the right through 2019, 2020, and 2021. All the exceptional crazy weather that you have seen over this last year or year and a half is that small little rise from 2017 to present, we are going to see some gargantuan changes through 2019 and 2020. Image is of cancelling magnetic fields on the Sun.

With headlines like this off IceAgeNow.info, Robert Felix's site, October 2nd this is in Calgary, Canada was the snowiest day on record. I realize the old record was only 5 centimeters, but this new record-breaking snow was 25 centimeters.

Not just for the day, but for the entire month of October.

2 Oct 2018 – A record-breaking 15 to 25 cm of snow fell in Calgary overnight, said CBC meteorologist Christy Climenhaga. The previous record for **Oct. 2 was set in 1954 with only about five cm.**

“But the all-time extreme record for one day in October is about 30 centimetres (12 inches) in 1914, so you guys are on your way to breaking that,” said Climenhaga.

A glimpse into Alberta here, famous tar sands oil production in Fort McMurray / Grand Prairie, Edmonton, Calgary blanketed.

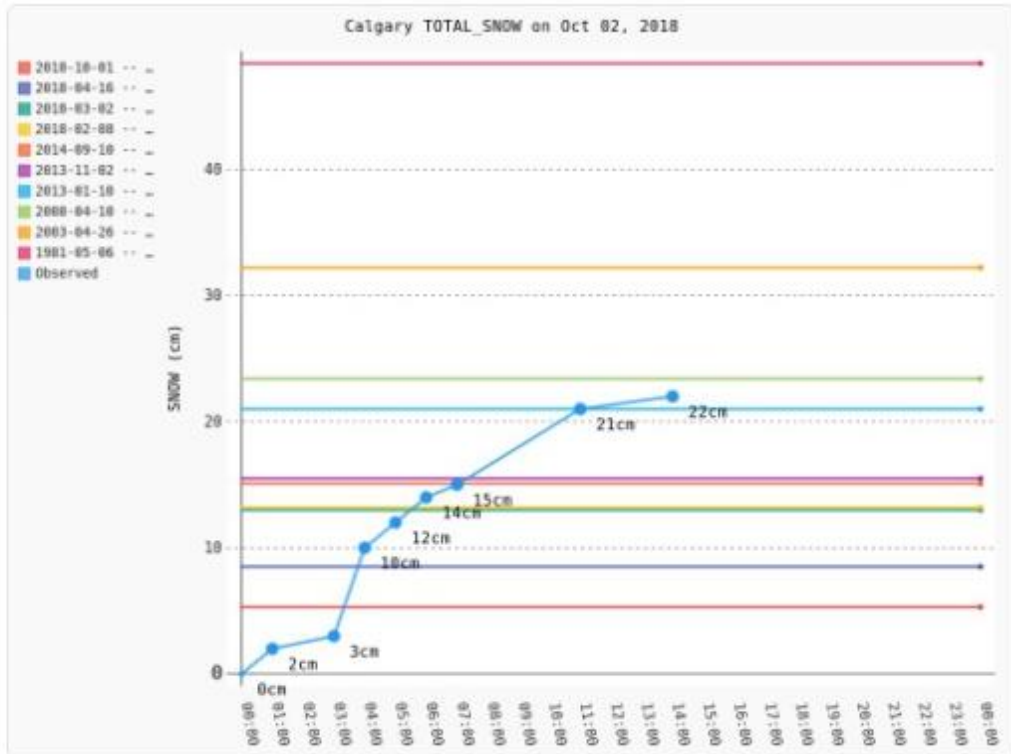

I thought really, how much snow is coming down up there? The YYC Weather Records, 22 centimeters, Calgary's snowiest October day in almost 61 years since 1957. It already snowed record snow back in September, so how much more record snow can we get before you say "Huh, I wonder if it's really not CO2 Global Warming, if there's another cause that they're not telling us about."

YYC Weather Records @YYC_Weather · Oct 2

With a 2pm snow total of 22cm, today is #Calgary's snowiest October day in almost 61 years, since Oct 21st, 1957. #YycWx

Record snowfall wallops Calgary, Canada first snowstorm of the season. This is not the middle of January or February, this is just a couple days after Autumn has started.

Record snowfall wallops Calgary in 1st storm of season

Two buses blocked the eastbound lanes of Memorial Drive shortly before 7 a.m. Tuesday. Buses on many routes were on snow detour Tuesday morning. (Tiphonie Roquette/Radio-Canada)

Calgary, locked down, they didn't even have the snow trucks out because the first snow flurries don't normally come until October 15th, this caught city officials completely off-guard.

Record snowfall wallops Calgary in 1st storm of season

Calgary Transit buses were no match for Tuesday morning's snow-covered roads. (Daniel Avellaneda)

A look through the city of images sent across social media, snow, more snow and more snow, just three weeks after Summer ended.

Record snowfall wallops Calgary in 1st storm of season

Record snowfall wallops Calgary in 1st storm of season

Calgary was hit by an early fall snowstorm Monday night. (Sarah Lawrynuik)

Even out on the trans-Canada highway, if there's this much snow I was thinking crop lands are all along that highway what would it look like?

Accidents near Lac des Arcs shut down the Trans-Canada Highway in the afternoon, stranding motorists for hours. (Dave Gilson/CBC)

Bouncing back to AGWEB, they had this thing about North Dakota receiving snow already, crops are definitely affected across this record snowfall during harvest.

Thanks for reading, hope you got something out of the article. Tri-weekly podcast Mini Ice Age Conversation, I go into much more detail with guests about these very same issues and how it's going to affect your life moving forward through these next several years as solar activity declines taking us back to temperatures we have not experienced in 400 years.
